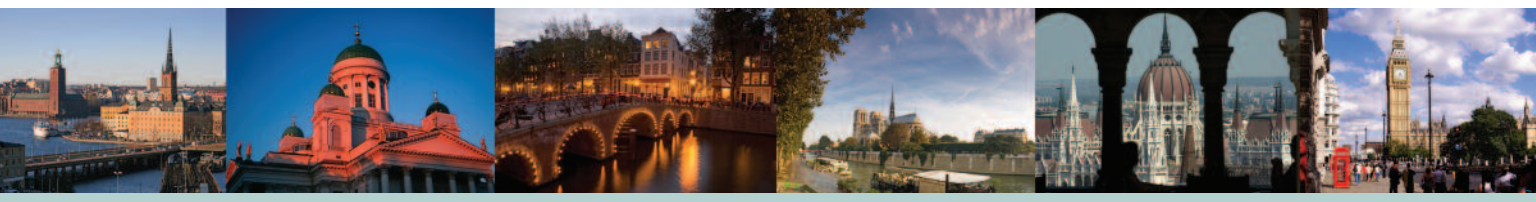
TRADE WINDS EUROPE



Featuring U.S. Companies Seeking European Business Partners

Business Council for International Understanding

is Proud to Support Showcase Europe Team in Istanbul

Established at President Eisenhower's initiative on November 10, 1955, the Business Council for International Understanding is a premier business association whose membership includes many of the world's largest multinational corporations in all major industries.

BCIU promotes international understanding through dialogue and action by organizing briefings and off-the-record discussions between senior government officials and key business executives on issues of common concern.

BCIU supports commercial diplomacy and corporate social responsibility in the international arena by facilitating roundtables and programs related to investment promotion, public diplomacy, corporate governance, and branding.

Dear Business Partner,

Welcome to this special edition of Commercial News USA, published in conjunction with the Trade Winds Europe Business Development Forum, April 14-16, 2008 in Istanbul, Turkey.

The American companies you see featured in its pages participated in the conference, and are interested not just in the Turkish market, but in opportunities throughout Europe and among Turkey's neighbors.

Over the past six years, the Turkish economy has grown strongly and consistently in response to comprehensive reforms initiated by the government, which last year was re-elected for a second five-year period. Turkey's continued commitment to reform, accompanied by political stability, has attracted record foreign investment – almost $50 billion – over the past three years. This investment has in turn contributed to Turkey's demand for U.S. products, materials, services and business partners to help continue to expand industry and respond to the

needs of an increasingly prosperous population.

I am proud of the role that American citizens and companies have played in Turkey's development, and I am certain that the readers of Commercial News USA will find many opportunities to build on the long and close commercial relationship between our two countries.

Sincerely,

Ross Wilson
U.S. Ambassador to Turkey

DISCOVER NEW HAMPSHIRE

A GREAT PLACE TO LIVE, DO BUSINESS OR TAKE A VACATION!

In a survey of all 50 states in the U.S., New Hampshire has been ranked as the "Most Livable State" for the last four consecutive years, fifth "Healthiest State" and the fourth "Safest State" in the country. Not only does New Hampshire offer exceptional quality of life, it is also one of the best places in the U.S. to expand or relocate your business. With one of the lowest tax burdens in the U.S., a highly skilled workforce and a business-friendly government, New Hampshire is the top destination for many companies. Did we mention snow-capped mountains, crystal clear lakes and sandy beaches? Whether it is spring, summer, autumn or winter, New Hampshire's year round beauty draws thousands of tourists every year. Come and discover New Hampshire!

POWER-GEN EUROPE

Coming June 3-5 2008, Fiera Milano-City Centre, Milan, Italy

POWER-GEN Europe is the undisputed home of the European power industry, enabling participants to discover tools and strategies to successfully develop their business while offering interaction with the largest group of European power professionals under one roof. POWER-GEN Europe continues to grow at every staging and is the "must attend" annual conference and exhibition for power professionals across the European landscape. Each year the comprehensive conference program tackles the issues facing pan-European power professionals, and the exhibition floor features more than 500 exhibitors: Europe's largest showcase of products and services tailored for power generation. Co-located with Renewable Energy Europe and POWERGRID Europe, POWER-GEN Europe continues to address challenges faced by the electricity sector as a whole by bringing together three key elements of the power industry under one roof: conventional and renewable power generation, transmission, and distribution.

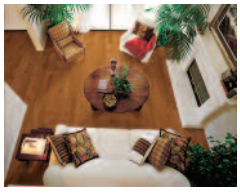
Aacer Flooring

The Manufacturer of Choice for Hardwood Flooring



Aacer floor systems are manufactured primarily for recreational and athletic markets. Aacer's complete line of performance sports floors are designed to suit your needs from NBA basketball to aerobics. Many of our systems meet or exceed DIN, EN, and FIBA testing requirements for performance. We also manufacture wood flooring for the commercial and residential markets. Aacer also specializes in high quality strip and plank flooring products offering widths up to 220mm and lengths up to 4.5 meters. We use a wide variety of woods and grades including maple, oak, cherry, birch, ash, walnut, pine, and hickory. Our flooring is manufactured in a unique environmentally and moisture controlled facility.

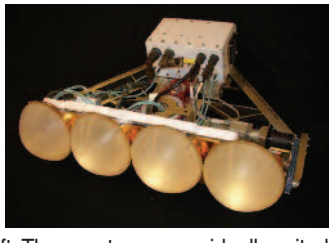
AeroSat Avionics

Advancing Communication through Innovation



AeroSat Avionics develops, produces, and distributes mobile wireless communications solutions to increase the flow of information to and from people on the move, whether in the air, on land, or at sea. From its patented core technologies, the company has created a product line of antennas for corporate and commercial aircraft. These antennas are ideally suited for airborne applications where performance is crucial. AeroSat distinguishes itself from other broadband communication providers with innovative data delivery, scalability, lowest cost, and market extension. These antennas enable worldwide reception of television in aircraft, two-way satellite communications, and aircraft-to-aircraft communications. Our newest product line enables passengers to browse the Internet, utilize voice over IP, and send and receive emails while in flight. Our antennas are currently operating on Qatar Airlines in Qatar and Kingfisher Airlines in India. Testing on major US airlines will begin in September of 2008.

Airborne Systems

Largest Selection of Parachutes and Related Products

Airborne Systems is a world leader in the design, development, and manufacture of best-of-class parachutes for military, personnel, cargo systems, space and air vehicle recovery systems, and deceleration systems for high-performance aircraft. The company also provides ordnance flare chutes, airbags, and weapons delivery systems. Airborne Systems, headquartered in Pennsauken, New Jersey, brings to the market and its customers a history and legacy that embraces four of the world's leading parachute companies, combining the resources of GQ Parachutes, Irvin Aerospace, Para-Flite, and Aircraft Materials (AML). Today, Airborne Systems is comprised of these brands. No other company has the combined resources of Airborne Systems and, for almost a century, compiled a proven track record of precedent setting milestones that demonstrate scope of capability, quality of product, and successful performance.

Birches Group LLC

Global Data for the 21st Century

Birches Group Labour Market Surveys provide reliable and consistent data in more than 140 countries throughout Africa, Asia-Pacific, Latin America, and "new" Europe. Our methodology captures all the key elements — salary, mandated payments, allowances, bonuses and profit sharing, plus benefits like transportation, housing, food, recreation, and loans.

A Methodology that Works

Our datasets are the only ones which capture both leading private sector employers and leading international public sector employers including embassies, development banks, multi-lateral organizations, and NGOs. We use the same, consistent methodology in all of our survey locations.

Information at Your Fingertips

Our Indigo survey portal provides flexibility and customization to meet your needs. Our Single Job Profile Reports allow you to determine your market position for one job in any of our survey countries.

Charleston Gas Light

Quality Copper Lanterns are "Green by Design"

Protecting the environment has always been important to Charleston Gas Light, and we are proud to be a leader in the lantern industry with our participation in the U.S. Green Building Council, promoting energy conservation, recycling, and reuse. We are equally proud that our lanterns are hand-crafted in the USA using quality copper and that all scrap copper is recycled. We encourage the use of gas safety igniters on gas lanterns to conserve fuel and the use of CFL bulbs in electric lanterns to conserve electricity. Choose from our collection of historic lantern designs or we can assist you with the design and production of custom lanterns. All of our lanterns carry the CSA safety listing and are certified for interior and exterior installations in residential and commercial locations. Visit our web site at www.charlestongaslight.com for more information.

Creative Film Corp.

Specialty Films for Printing

Creative Film Corp. is the manufacturer of a line of second surface embossed films with the appearance of being three dimensional, yet with a smooth top surface for printing. All films are readily printed by silkscreen with PVC inks or solvent ink jet. All the manufacturing is done in house under the supervision of the owner and creator of most of the designs, Joe Coburn. Current employees average in excess of 20 years manufacturing these products. These products have a design life of five years for exterior work, although we also have a commodity grade for less demanding and interior applications. Both qualities are "look alikes," the difference is in the chemistry. Creative Film has recently embarked on a program to be ISO 9000 certified in 2008. Current processing includes extruding, compounding, metalizing, adhesive coating, laser engraving, sheeting, and slitting.

Dartware LLC

InterMapper Network Monitoring Software

InterMapper network monitoring and mapping software from Dartware provides a big picture view of network performance and traffic. InterMapper's maps provide location data for all network devices and connections. Live traffic views visually point out slow-downs or potential problems. Administrators use maps to drill down to sub-maps and underlying diagnostic details and trend reports. Configurable alerts keep network teams informed of potential problems around the clock. Thousands of companies around the world are using InterMapper as a stand-alone network monitoring tool or in conjunction with network management platforms. InterMapper runs on Windows, Mac OS X, and Linux platforms and returns detailed network device information via vendor-specific and SNMP probes.

High Street Partners

High Street Partners Offers Global Expansion Services

High Street Partners offers a range of cross-border services to companies doing business internationally. We provide a single source for the implementation and ongoing management of international subsidiaries and other entities including set-up, payroll, accounting, tax compliance, advisory, and HR localization services. HSP expands the capabilities of the headquarters management team, allowing it to work strategically rather than operationally while mitigating risk.

We enable HQ finance and HR teams to ramp up their international plans quickly and efficiently, whether they're in one country or a dozen, delivering tangible ROI and better value than adding infrastructure internally. High Street Partners has offices in Boston, London, Annapolis, Arlington, New York, San Jose, San Diego, and Austin with technical specialists in the UK, India, China, and Japan. We also have expert local service providers on five continents.

Kestrel Pocket Weather Meters

Personal Weather Meters for All Applications

Kestrel Pocket Weather Meters are the world's most relied-upon personal weather instruments! Pocket-sized and easy-to-use, Kestrel Meters let you monitor the environmental conditions wherever you are. Fifteen different models measure: wind speed, temperature, relative humidity, density altitude, evaporation rate, humidity ratio, wet bulb temperature, volume air flow, dew point, barometric pressure, and more. In-depth data storage, charting, and computer upload are available with the Kestrel Interface. Long-term data collection is possible with the Kestrel Portable Vane Mount. Each hand-held Kestrel Meter is individually calibrated for guaranteed accuracy, and NIST-traceable certification is available on any unit. Waterproof, rugged and durable, Kestrel Meters are made in the USA and are covered by a five-year warranty.

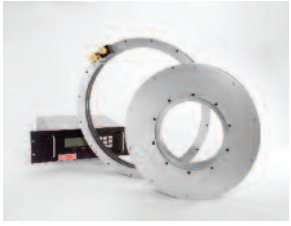
LORD Corp.

Balancing Systems by LORD Corp.



LORD Corp. is a global, privately-held company that designs, manufactures, and markets devices and systems to manage mechanical motion, control noise, and vibration; formulates, produces and sells general purpose and specialty adhesives and coatings; and develops products and systems utilizing magnetically responsive technologies. LORD Corp.'s Balancing System is permanently mounted on rotating machinery, continuously monitoring vibration levels and correcting unbalance while the equipment is running. Particulate buildup on impellers can cause an imbalance in the rotating machinery which can then lead to unscheduled and costly shutdowns to clean the impellers. Unlike traditional balancing techniques, the LORD Balancing System compensates for imbalance while the piece of rotating machinery is in operation, improving operating efficiencies and reducing downtime. LORD Corp. is headquartered in Cary, N.C., USA.

Mammoth Inc.

Customize Your Experience with Mammoth® Heat Pumps

Mammoth is experienced in supplying water-source/ground source heat pumps (WHSPs) and commercial products for building comfort systems, from multi-unit residential to the largest commercial networks. This is an ideal renewable energy system for both heating and cooling, sometimes both simultaneously, using a building water loop or earth loop as both a heat source and heat sink. Our pumps easily integrate with boiler and tower systems, or can be installed in geothermal configurations. Mammoth can provide energy solution systems to meet specific heating, cooling, and building control requirements. Available in ½ to 150 tons in horizontal, vertical, split, and outdoor configurations: compact, energy efficient, and with low sound levels. Mammoth Inc. is a CES Group™ company with global manufacturing facilities including China. This affiliation extends Mammoth's marketing research and provides additional engineering and application expertise.

Sky-Skan

Amaze and Educate Audiences with a Definiti® Theater from Sky-Skan

Sky-Skan is redefining planetariums with its new Definiti digital dome theaters. Audiences gaze at a giant dome screen covered with immersive visuals and accompanying surround sound. The theater transforms into a portal of fantastic worlds to discover and explore. A live tour of the universe, given by an expert tour guide/presenter, is just one of the show possibilities. A range of science and entertainment subjects can be shown either real-time (with a presenter at the controls) or played back with simple pushbutton ease. The range of Definiti theater options includes everything from hardware and software to design, training, and support. Definiti customers include the world's first 3D planetarium ('Imiloa Astronomy Center), Smithsonian's National Air and Space Museum (Washington, D.C.), Artis Planetarium (Amsterdam), Eugenides Planetarium (Greece), Melbourne Planetarium (Australia), Songam Observatory (South Korea), and ocean liner Queen Mary 2. Sky-Skan Europe phone number: +49 89-6428-9231.

The Moore Company, Inc.

The Unique Moore LOCKERBASKET®

The Moore Company, Inc. manufactures an overhead clothes storage system for industries whose employees are exposed to heat, dampness, dust, or contaminated working environments such as mining, steel mills, foundries, and glass plants. Clothing is securely suspended overhead, completely exposing it to circulating fresh air. The unique design safely stores personal effects and clothing from the large welded wire basket. Moore's LOCKERBASKET system is shipped complete with all baskets, hooks, roof support channels, bench system, and operating equipment. This system is easily and economically installed in any industrial building with a 16-foot (4,880 mm) ceiling height in the change room area. By utilizing the complete, integrated system approach, savings of up to 40% are realized in labor, material, and floor area. Engineering and technical support is available for preliminary design assistance, preparations of final layout drawings, and estimating for new change room facilities. The Moore Company, Inc. is headquartered in Charleston, West Virginia, USA.

Timberline Tool

Timberline Tool Seeks Distributors for Specialty Tools

Timberline Tool seeks distributors for PE pipe squeeze-off tools and fire hose shut-off tools. Timberline Tool manufactures these innovative tools for the natural gas, water and firefighting industries worldwide. These tools safely, effectively and efficiently shut off the flow of liquid or natural gas without damaging the firehose or polyethylene pipe. Timberline Tool's line of PE pipe squeeze-off tools are designed for open trench, confined space and keyhole excavations and are used to repair and maintain polyethylene (PE) pipelines, while Timberline fire hose shut-off tools are designed for use in both structural and wildland firefighting and are used by firefighters when adding hose, replacing hose, or changing nozzles. Both lines of tools improve the safety and efficiency of operators. For more information visit our website at timberlinetool.com or email us at sales@timberlinetool.com.

WatchGuard Video

World's #1 Selling Police In-Car Video System

The WatchGuard DV-1 is the world's first digital, police in-car video system that records evidence video, such as traffic stops, directly to DVD-Video, creating discs that play on regular DVD players. No special back office equipment or servers, trunk mounting, or environmental controls are needed. The system is available in an Overhead or Modular version to fit any law enforcement vehicle. Traffic stops are automatically divided into selectable chapters like a Hollywood movie. The DV-1 features two high-resolution, full-color cameras, a wireless microphone system, and optional features such as an integrated GPS Receiver or Radar Interface Cable. The system records up to eight full hours of high quality digital video on a single, inexpensive DVD that may be reused many times. Perfect for presenting your video evidence in court!

No matter what you ship, we move your bottom line, up.

Why do some of the world's best known companies trust NTG to handle their most precious cargoes? It's not just because we reduce costs by managing shipments more intelligently for on-time, intact delivery. It's not only because our proven knowledge of global trade compliance rules for diverse cargoes — from specialty chemicals and health care products to industrial and consumer goods — has earned the respect of customers and government agencies alike. And it's not because we never lose our zealous but personal touch in spite of being one of the most respected providers of on-line logistics performance information.

Sure, it's all of that. But it's largely because we look beyond the obvious to leverage measurable economies that move your bottom line, up.

We are NTG, a proud member of the BDP Global Network. In Turkey and every major market around the globe.
For the full story, contact our logistics experts in Istanbul at (+90) 216 327 7885, or email info@ntg.com.tr.
